

Velimo Platform The ultimate guest experience

Meeting your guests' needs isn't enough? Do you want to exceed your guests' expectations of excellent service and convenience? Do you want to create the ultimate guest experience, streamline your business processes, and search for a partner developing future-proof hospitality solutions? The Velimo platform enables you to go one step further into a digital market. Let us consult, support and provide you with technologies and services – not only to benefit your clients, but yourself as well.

- Velimo platform at a glance**
- Direct communication channels to guests and users
 - Optimization of on-property service processes
 - Seamless integration in existing environments
 - State-of-the-art technologies
 - Adaptable to changing requirements or market expectation

The next generation of travel

Velimo creates an integrated, digital touch-point between hotels and their guests on different digital devices in order to take the ultimate guest experience to new heights.

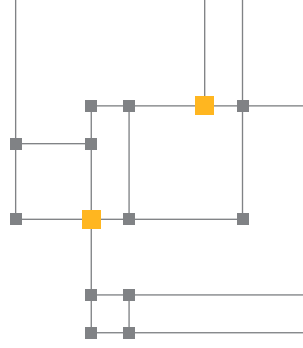

Velimo's user-friendly apps facilitate an optimum of service and communication. Seen as an accompanying partner throughout a traveler's journey, the Velimo

app provides its users with a dedicated customer experience dependent on their current status, e.g., service request functionalities, a mobile key card solution, entertainment or room control functionalities, to enhance their on-premise service or "digitally smart" hotel rooms. Whether a guest is still at home (about to book), on their way to the hotel or already checked in, choosing add-ons and activities for the stay – Velimo enhances the guest experience by offering a content-aware application that gives them what they need, when they need it.

Enhancement of travel expectations

An integrated, digital touchpoint

Velimo TV provides guests on property with classical entertainment features like IPTV, video or music on demand or hotel information. The Velimo TV app seamlessly interacts with the virtual remote control functionality of the Velimo mobile app.

Velimo digital signage displays passive, interactive and dynamic content on property on public screens, such as weather information, interactive guest feedback, floor plans and hotel information.

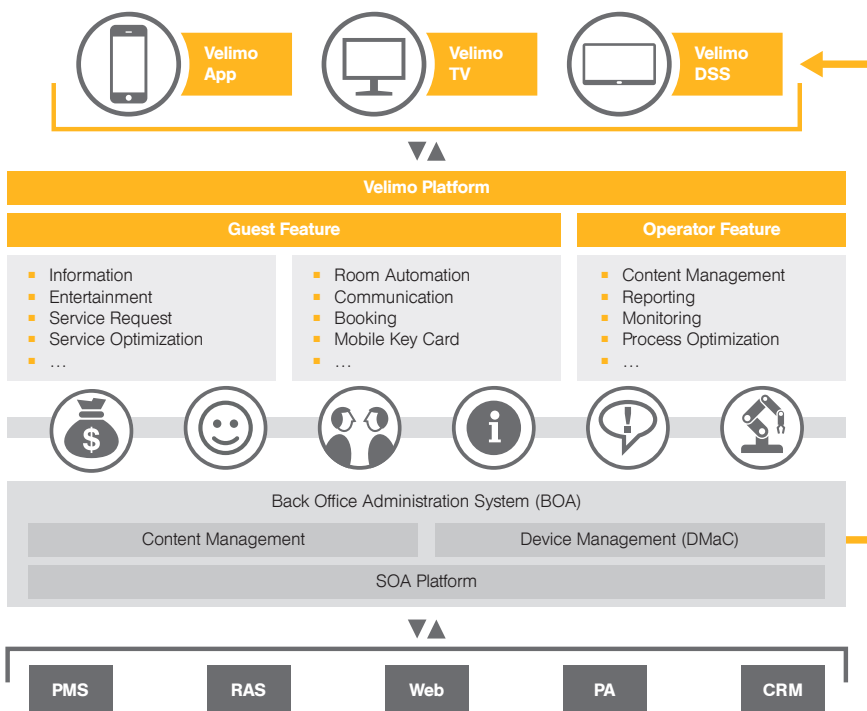

Uniquely configured

We understand your love for your brand. And for this reason we want to bring your corporate identity into your Velimo. By branding all applications accordingly, the Velimo platform facilitates a holistic marketing approach, such as strengthening a guest's brand awareness, creating a new way of service and communicating directly to your guests.

Service-oriented architecture

The service-oriented Velimo platform and its devices can be managed via Velimo's back office administration tool. Velimo is adjustable to commonly used third-party system interfaces and adaptable to changing requirements or market expectations. Each Velimo platform is uniquely configured and exactly fitting to a customer's specific requirements. Existing business and operational processes will be taken into consideration as well as all technical, service and marketing requirements.

As a full-service IT provider, we can also deliver a turnkey IT solution for hospitality. Let us take your vision and make it a reality.
